

# PWAs in Production

## meetup 20 September 2017

**Front-end Forward**

Powered by De Voorhoede

# DE VOORHOEDE

a team of  
**20+ front-end devs**  
2 project managers

in **Amsterdam**  
and **Rotterdam**

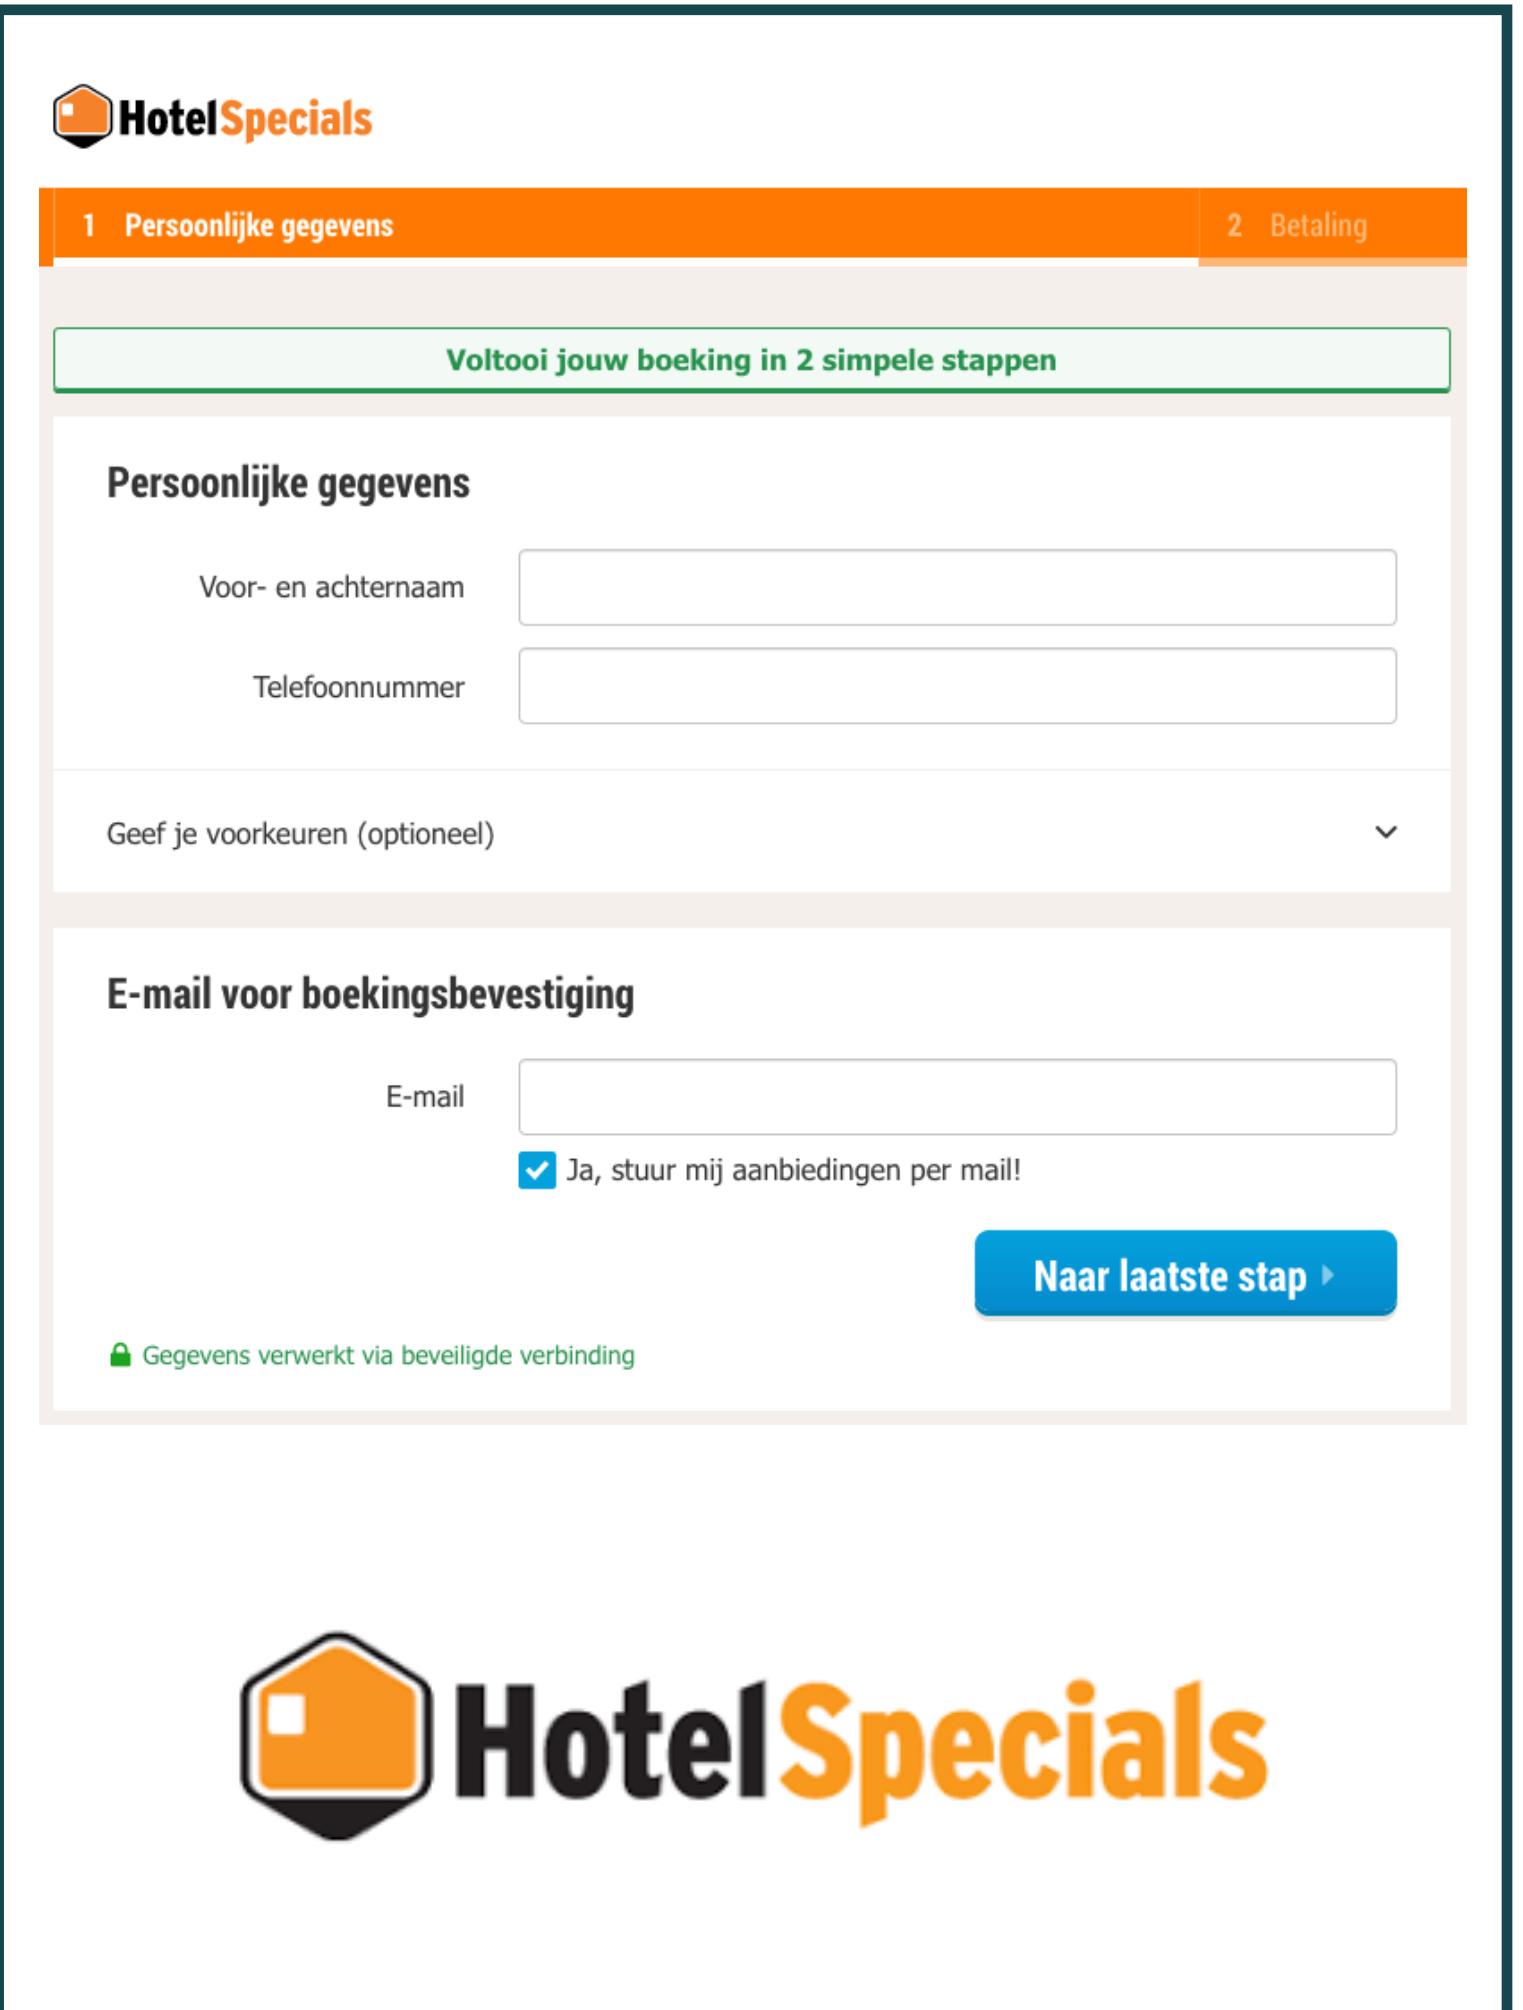

we keep up with  
the **latest web**  
**technology**

we **share** insights  
and open source  
tools

# OUR WORK

The screenshot shows the first step of a two-step booking process on the HotelSpecials website. The header reads "Voltooi jouw boeking in 2 simpele stappen". The form contains fields for "Voor- en achternaam" and "Telefoonnummer". Below these, there's a dropdown menu for "Geef je voorkeuren (optioneel)". The "E-mail voor boekingsbevestiging" section includes an "E-mail" field and a checked checkbox for "Ja, stuur mij aanbiedingen per mail!". A blue button at the bottom right says "Naar laatste stap ▶". At the bottom left, a small note states "Gegevens verwerkt via beveiligde verbinding".

The screenshot shows the search interface for funda.nl. It features a headline: "Een huis dat alles heeft, zelfs terrasjes om de hoek". Below this is a yellow search bar with three tabs: "Koop", "Huur", and "Meer ▾". The search bar contains the address "Spaarndammerstraat, Amsterdam" and a distance filter "+ 0 km ▾". Below the search bar are filters for price ("van € 0") and area ("tot Geen maximum"). A large blue "Zoek" button is at the bottom. The funda logo is visible at the bottom.

The screenshot shows a SITA self-service kiosk at an airport. The screen displays a boarding pass scanning interface with the text "Scan your boarding pass" and "Scan your boarding pass". To the right of the screen, a dark panel has a small circular indicator. The SITA logo and the tagline "Create success. Together" are at the bottom.
